

CHRISTENSEN'S PLANT CENTER

Wholesale Supplier To Landscape Professionals

Concolor Fir

This is my all time favorite full sized evergreen! The number one thing going for it is there are no diseases or insect pests, at this time. (I've been saying "at this time" for 12 years!)

I love the long soft needles, and their citrus odor, and as the tree matures the branches get an attractive contrasting whiteish color. The trees range in color from green to blue. We are fully stocked with Concolors in the 6'-8' range. They're a GREAT alternative to Colorado Spruce!
