

# CHRISTENSEN'S PLANT CENTER

## Wholesale Supplier To Landscape Professionals

## LIMESTONE!

Limestone has been used in many historical and notable buildings such as The Biltmore Estate, The Empire State Building and The Pentagon.

AND YES, we have  
LIMESTONE!

We currently stock 24" and 28" pillar caps, and we're soon to have some coping with two different types of facing. And we can get all the limestone you need for your next exciting project.

We can supply limestone in wall and pillar caps, seats for patio benches, balustrades, finials, keystones and so much more. If you can design it, give us a chance to bid it.

Ogee (OG), angled, or radiused edges on limestone add to the interest and excitement of any porch, patio or pool. Have you considered top caps for your walls using 4, 5, 6 foot or longer limestone pieces? These pieces can be straight or curved with various thicknesses to meet your needs.

Along with five lines of pavers, wall stones, steps, fire pits, and outcroppings - we can help set your project and your client's property apart from the rest with limestone!

CHRISTENSEN'S continues to be your number one  
LANDSCAPE & HARDSCAPE CENTER!
