

# CHRISTENSEN'S PLANT CENTER

## Wholesale Supplier To Landscape Professionals

## Enhance your landscape with Sollos lighting

Happy Spring, one and all! In 2011, we stocked a new landscape lighting line called Sollos Lighting. (visit them at [solloslighting.com](http://solloslighting.com))

With the success of the product line that we have had so far, we will be stocking even more of it. Sollos aluminum spot and path fixtures are durable, dependable ( 5 year warranty), inexpensive, LED compatible, and come in 3 colors: Black, Textured Bronze, and Verde Green.

Other metallic finishes are available through special order on certain fixtures as well: Brass, Antique Brass, Stainless Steel, and Copper. Transformers, photocells, timers, halogen and LED lamps, and low voltage wire are also readily available.

So when you're doing your landscape designs for your upcoming job, leave some room for the lighting. If you have done a job in the past, contact your previous customer and offer them an inexpensive enhancement to their current landscape. A little bit of light goes a long way!
