

CHRISTENSEN'S PLANT CENTER

Wholesale Supplier To Landscape Professionals

Are you tired of replacing Rhododendrons?

We have just the ticket - Actino-Iron Biological Fungicide with Iron & Humic Acid. This is an organic soil additive that fights root rot diseases and gives the plants a slow release iron. Actino-Iron protects your Rhododendrons from Phytophthora and helps keep them green.

Add ¼ cup around the base of the plant at planting time, and water. I used it as a top dress on my existing PJM Rhododendrons last spring and they never looked better.

It can also be used on annuals, perennials, lawns and gardens. It comes in 3# and 10# bags. Great insurance for your plants!
