

CHRISTENSEN'S PLANT CENTER

Wholesale Supplier To Landscape Professionals

Drainage problems?

Are your customers experiencing drainage problems? Did you know we carry a full range of products to fix or prevent these problems?

Low spots in the yard can be remedied with an NDS Flo-Well that will allow excess water to leach back into the soil.

You can also redirect water from downspouts through an NDS catch basin to keep water flowing away from foundations and landscaping.

If your drainage problems occur on patios or driveways, install channel drains and grate to prevent costly water damage.
