## Wholesale Supplier To Landscape Professionals

### Water Features Made Easy

A water feature is the finishing touch to a complete landscape. It adds the elements of sound and movement. Doing it can be quite challenging. Easy Pro has a number of attractive, self contained, water feature packages to solve this problem.

The disappearing fountains, statues, vases, and rocks are very popular. We have a number of complete kits set up in our main building. Easy Pro reference guides are available here or simply go on line to review all the options.

They are easy to install. The basin is placed in an excavated hole and a decorative fountain piece is placed on top. A submersible pump is connected to the fountain, then placed in the basin. Cover the top of the basin with decorative stone and add water.

These kits are reasonably priced and could be a profitable addition to a project.
