The late spring flowers are white and fragrant, approximately 1" and are in Wisteria-like racemes up to 14" long This tree is spectacular in bloom. The compound leaves open bright yellowish green and change to green by summer. The fall color is yellow, gold and sometimes orange.

This medium size tree with it's spreading habit make it an excellent choice for medium and small properties. It can be used as a single specimen or in groupings. Yellowwood is hardy in zones 4-8 and is disease and insect resistant.
