

# CHRISTENSEN'S PLANT CENTER

## Wholesale Supplier To Landscape Professionals

### THE LANDSCAPE BUDDY

What are those green three wheel contraptions? And what do you use them for? I'm glad you asked!

They are the difference between saving money or losing money, time and man hours on a replacement or small job.

The Landscape Buddy is a "ball cart" that handles plants that are too big for a regular ball cart and is a whole lot cheaper than transporting a \$40,000 piece of equipment for as little as one tree.

We have tested some 3.5" trees on the Landscape Buddy and rolled them around the yard with one guy pulling it. The Hardscape Center loaded over 2000 lbs. of sand bags on it and could not break it, nice try, Mark!

It was designed narrow enough to fit through gated properties and allows two – three employees to move it. The tires are wide turf tires to travel over lawns without the damage of a machine. Can you say that about the \$40,000 skid steer?

There are some excellent videos on the internet of what this "ball cart" can do for you, I encourage you to look. AMAZING! If you ask Jim or Bryan, they can show you while you're visiting us.

How much are they? I'm glad you asked! Would you believe \$1300.00?

WOW, you say! Humor me and look at the videos and then start counting how many times you wish you had one.

Oh yeah, did I mention we do offer to rent them at \$50.00 a day if you're not convinced?

Always use the "KISS" method and work smarter, and cheaper.
