

# CHRISTENSEN'S PLANT CENTER

## Wholesale Supplier To Landscape Professionals

Deer deterrents are not foolproof and can't always be counted on - but neither are the Detroit Tigers. You can count on them to show up but you can't count on what they are thinking.

Most repellents work, but for how long until you have to reapply or the deer get stubborn or immune.

Christensen's has been selling Liquid Fence Deer Repellent for 15 years plus and Deer Scram for six years. Both products work real well if applied properly. Both work for 3-4 weeks.

I know this because we've been selling it for so many years and to the same customers. I have used it in my own yard to deter rabbits from feeding on my hearty landscape and they have stayed away for the last four years, the last two I've had to apply very little.

Deer Scram is a fine granular product that needs to be applied as a 16" wide barrier surrounding the planting beds. This apparently is strong enough to stop them in their tracks (our own Chris or Wayne Neilson will attest to this). This product also works on top of or under snow.

Liquid Fence is a liquid (duh) and may need to be applied a little more often, due to rain and snow. It is applied directly on the plants. If the smell doesn't do it the taste will.

Both products will not endear you to your neighbors, at least until the aroma fades. My neighbors unfortunately like to take late night walks.

Deer fence is also a good product but takes a little more work. I would be glad to bring in a 7' x 100' roll for you.

This is a game; you, like the TIGERS hope to win more then you lose.

Go Lions!
