

CHRISTENSEN'S PLANT CENTER

Wholesale Supplier To Landscape Professionals

Helpful hints to make your short spring easier...

Make sure your clients know that you can safely plant for them all summer long with proper care.

Make sure you always tarp your plants when transporting them.

Give all new plantings a thorough watering after they're in the ground.

Soil additives greatly increase a plant's ability to not only survive but thrive. Everyone should be using Biotone Starter "Plus" and Soil Moist, mixed with a good back fill such as a topsoil / compost mixture.

Where is our spring? What has happened to the beautiful Michigan springs of past? It seems like we now jumped from the ice box to the oven. It's hard for us in the green industry to keep everyone pleased when the digging season is shortened due to heat and of course lots of our clients want things done by graduation or the 1st back yard party time in early June. No one said it would be easy.
